

Weapon Parameters

In order to integrate the weapon into the measuring stand and control the measurement process, it is necessary to record the weapon's parameters. There is a risk that the weapon's individual design may prevent it from being integrated into the measuring stand. Having the weapon parameters available minimises this risk and may avoid unnecessary weapon transport.

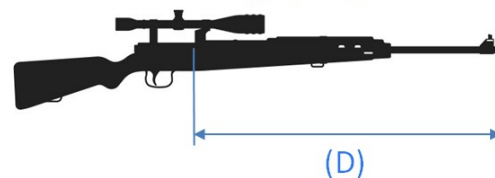

Manufacturer / Model		
Serial Number		
Caliber		
Gun Length (A)		[mm]
Shaft Height from Barrel Centre (B)		[mm]
Free Barrel Length (C)		[mm]
Barrel Length (D)		[Inches]
Twist Length (E)		[Inches]
Barrel Diameter (F)		[mm]
Number of Fields (G)		[]

If individual parameters cannot be determined by the customer, or only with considerable effort, please leave blank. The values can be determined during integration into the test bench.

Waffenlänge [mm]

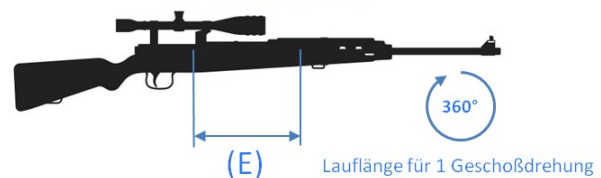

Lauflänge [Zoll]

Kolbenhöhe ab Laufseele [mm]

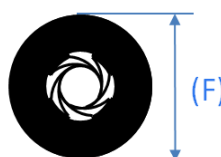

Dralllänge [Zoll]

Freie Lauflänge [mm]
